

Darmstadt, March 17th 2021

To whom it my concern,

**REACH regulation compliance / Substance of Very High Concern “Candidate List” –
January 19th 2021 update**

We remind that the European REACH Regulation (EC) No 1907/2006 on Chemicals, which entered into force on June 1st 2007, aims to assess the risks associated with the use of chemicals covered by REACH and placed on the market, and to ensure that all management measures to control these risks are applied throughout the supply chain.

On January 19th 2021, ECHA (European Chemicals Agency) published on its website the updated list of substances candidates for authorization (substances of very high concern – candidate list). This list can be consulted at the following address:

<https://echa.europa.eu/en/candidate-list-table>

We hereby certify that none of the 211 substances on the Candidate List updated on January 19th 2021 is present at rates above the regulatory threshold of 0.1% in tires produced by PRINX CHENGSHAN TIRES and placed on the European market by the Business Lines “Automotive B2C”.
